

CSI 3130 - Assignment 3

Working calculator grammar which handles multiple variables.

Judah Olotu

Karim Chukfeh 6694525

Kritika Wadhera

Stephanie Giang

Tokens

semicolon ; at the end of statements

print `print` to output the result of calculations

Compiling and using the calculator

Step 1

```
sh build_partial.sh
```

Step 2

```
build/calculator_partial
```

Step 3

The calculator is ready to handle your statements

```
print 1+2; outputs Calculator output: 3
```

Or even

```
x = 2;
```

```
y = 3;
```

```
print x + y; outputs Calculator output: 5
```

Clean up

```
sh clean_partial.sh
```
